Experience

General Assembly, New York, NY

Full Stack Engineering Student, Sept 2015 – Dec 2015

Built various projects using front-end and back-end tools such as the MEAN stack, Ruby, Rails, Sinatra, JavaScript, AJAX, HTML, and CSS.

The Usual: Node.js app that allows users to keep track of their usual meals and share them with others via email or SMS. Express.js, Mongoose, Body-Parser, MD5, and Cookie-Parser modules used, Twilio API used.

Woof: Rails app where users can review dog-related products with gifs. Postgresql, Bootstrap, Devise, Carrierwave, Fog, and HTTParty gems used, Giphy and Amazon S3 API's used.

Connect Four: Simple JS connect four game where users can either play an AI or each other. HTML, CSS, and JavaScript used.

Found My Hound: Rails app where users can find and meet adoptable dogs in their area. Devise and Carrierwave gems used.

MADEO, New York, NY

Digital Designer, Mar 2015 – Aug 2015

Designed visual brand guides, the UI, and UX of web-based projects for various clients with Adobe's Creative Suite, HTML, and CSS.

Rocketdog NYC, New York, NY

Junior Designer, Aug 2013 – Nov 2014

Led various web projects by designing the UI and UX, preparing assets for development, developing the front-end, and managing content through a CMS.

Atlantic Records, New York, NY

Digital Media Intern, June 2013 – Aug 2013

Created a range of digital media assets including static and gif web banners, social media skins, splash pages, websites, logos, and illustrations.
